Expanded PTFE Joint Sealant Tape

Code: RGS1800

Description

The EPTFE Tape is an inorganic sealant for static applications made of 100% PTFE. A unique process converts PTFE to a micro-porous fibrous structure, resulting a sealant with an unsurpassed combination of mechanical and chemical properties. It is supplied with a self-adhesive strip for easy fitting.

Item no.: RGS1800

Expanded PTFE Joint Sealant Tape Item no.: RGS1800

The EPTFE Tape is an inorganic sealant for static applications made of 100% PTFE. A unique process converts PTFE to a micro-porous fibrous structure, resulting a sealant with an unsurpassed combination of mechanical and chemical properties. It is supplied with a self-adhesive strip for easy fitting.

Typical Applications

Expanded PTFE Joint Sealant Tape is specially suited for sealing flanges connection, pipe systems, hydraulic and pneumatic system, etc.

Prime Features

- * Saves money and time.
- * There is no scrap or waste, it costs less than other gasket material.
- * Installation time is kept to a minimum since there are no templates, precut or special fitting requirements.

Specification

Media: Acids, alkalis, solvents, gases, etc.

Temperature: -240 up to 260 deg.C

Pressure: 100bar PH valve: 0~14

Density: Grade A/B 0.70/0.80 g/cm3

Other density on request.
